

DECCOServ

We are an integrated construction service provider dedicated to customized maintenance and facilities management programs, shutdown support, and specialized plumbing.

Our experienced technicians collaborate with owners to develop customized service and maintenance plans to fit their unique needs. DECCOServ focuses on critical process systems, specialty plumbing, shutdown planning, and small to mid-sized projects. Our services include:

Customer Alliance Programs

- An integrated, responsive, on-site team supporting small projects and maintenance programs for our client's needs.

Service Fleet

- ASME-certified welding services for pressure vessel modifications and repairs needed at client facilities.
- Fleet of fully-equipped service vehicles that specialize in FDA-validated systems, ultra-high purity environments, food & beverage, specialized chemical, biopharm, and industrial power & energy industries.

Special Projects

For fast-paced projects that provide unique logistical challenges, our dedicated project teams have the expertise and technology to execute complex work in operating facilities with minimal disruption. Our capabilities include:

- Proprietary control systems tailored for small to mid-sized projects utilizing Lean construction principles and prefabrication.
- Provide 3D scanning and geospatial surveys for project execution within an operating space.

Specialized Plumbing

Our fully licensed and highly-trained technicians are qualified to work in complex, specialized environments within industrial and operating facilities. We offer:

- A fleet of fully-equipped vehicles ready to respond to our client's urgent specialty plumbing needs.
- Code review and constructability surveys.
- BIM modeling, 3D scanning, Trimble layout, and piping system design.
